

The extraterrestrials have landed and they're human. Rae Hemplewhite didn't believe in aliens until a close encounter with out-of-this-world technology drags her into the extraterrestrial security program. Helping alien refugees adjust to life on Earth is difficult enough, but her first clients have a price on their heads. Plus, her new partner seems torn between the urge to kiss her or kill her. And that's the good news. The bad news: Alliances are forming in deep space. If Rae doesn't keep her witnesses alive long enough to transfer their top secret information to the right faction of humanity, Earth will become a battlefield.
