

This collection of principle documents completes the twenty year IEA History survey which began with institutional aspects of the Agency (Volume I, Origins and Structure) and continued with the Agency's operational activities (Volume II, Major Policies and Actions). The main purpose of this volume is to make available in convenient form the texts of major policy decisions discussed in Volumes I and II. In addition, Volume III carries forward to 1995 the highlights of major IEA developments featured in the first two volumes. Covering the period 1975-1995, Volume III also contains the full texts of the Agency's Ministerial Communiqués, together with lists of the IEA's publications and conferences, and includes a bibliography of IEA related materials as well as an index of the three volumes.
